```cpp
#include<iostream>
using namespace std;

int main(){
    int num;
    int tempNum;

    num = 18;
    tempNum = num * 2;

    cout<<"Num = "<< num <<", tempNum = "<< tempNum << endl;

    return 0;

}
```

```cpp
#include<iostream>
using namespace std;

int main(){
    int num;
    int tempNum;

    num = 18;
    tempNum = num * 2;
```
